

CLOUD BACKUP FOR SALESFORCE & DYNAMICS 365

CLOUD BACKUP FOR SALESFORCE & DYNAMICS

Sequentex, Inc. is a pioneering woman-owned technology company that specializes in crafting integrated solutions to propel organizations forward.

Partnering with Assured Data Protection, a global data backup, disaster recovery and threat detection managed service provider, we are able to deliver scalable solutions to customers, MSPs and resellers in more than 50 countries worldwide. Together with Assured we operationalize CRM backup solutions delivering data security and protection to customers of any size.

Our combined dedicated team provides 24/7/365 support to ensure customers can protect, detect and recover critical data and operations with minimum downtime. Our managed services solution, delivered by Assured is built on the AvePoint's cloud data management and our ProtectView management platform to ensure resiliency against data loss, natural disasters and cyber attacks.

ACCIDENTS HAPPEN

Salesforce and Dynamics 365 are both crucial and expensive platforms. For a fraction of the cost, Assured Cloud Backup provides daily backups, on-demand backups, and comprehensive restore tools to protect your business.

LOOK BACK, GO FORWARD

With backup comparison reports, you can understand how objects and meta-data change over time. Alongside the daily reporting from ProtectView, you can see what changes have occurred with your data to detect anomalies.

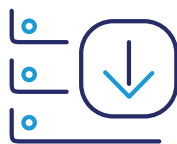

SIMPLE AND SCALABLE

Assured Cloud Backup can support organizations from SMB to Enterprise. Back up restorations preserve Parent - Child relationship records to ensure data integrity.

FULLY MANAGED BACKUP

Assured actively monitors and manages the health of the Backup environment. Leverage our experts globally 24/7/365.

COMPREHENSIVE RESTORE OPTIONS

Rapid restores at the org, object, record and field levels.

ENCRYPTED PROTECTION

Using MS Azure Encryption and account security, to meet any compliance regulations around your data.

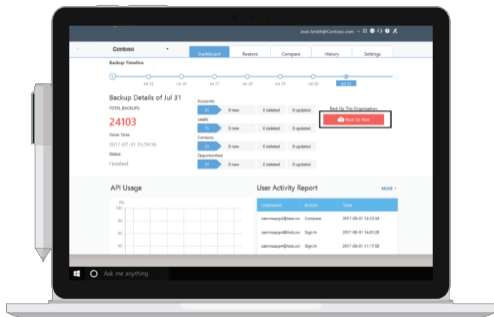

ASSUREDVIEW INTEGRATION

Receive a daily health reports of your CRM backups and access to the health of your backups on a single user interface.

TECHNICAL OVERVIEW

- Schedule additional backup jobs up to five times per day with the click of a button.
- Compare backup versions to understand how your objects and meta-data have changed.
- Store your backup data in our default location or your own Microsoft Azure Storage.
- Support restoration of data at the organization, object, record, field, and meta-data levels.
- Perform out-of-place restoration of data with full fidelity and user mapping.
- Preview records for selected object type before performing an object restore.
- Support restoration of parent and child relationship records.
- Quickly locate the specific records you need to restore through keyword search capability.
- Allow end users to restore a record or fields of a record directly via the CRM interface.
- Identify records from the backup data, purge individual fields or entire records to ensure compliance.
- Comprehensively review backup and restore details via the Central Command Dashboard or history reports.
- Build high fidelity content for your sandbox environment without compromising user privacy.
- Gain full visibility of how your backup and restore service is being used.
- Trim security for specific users by either granting access to or limiting available features according to their role.

BOOST CONFIDENCE WITH CLOUD BACKUP FOR SALESFORCE & DYNAMICS 365

Don't work without backup. With Cloud Backup for Salesforce & Dynamics 365, you'll be in the driver's seat when it comes time to perform or export a backup, create reports, restore or secure new data with just one click.
