

Jim,

Just wanted to tell you how happy I was with the entire process and implementation... In all my years of telco I haven't experienced the attention to detail and professionalism with a large phone system install... By 10:30 everything was connected to the Axxess network the techs had everything online porting was completed promptly at 1:30... Everything was up and running perfectly, training was done and everyone was happy and I'm happy!!!

This is what my manager at the location sent::

These phones are the bomb 💣!! Thanks again , crystal clear also !

Am looking forward to continuing business and trying to get myself out of Nextiva at my 3 other locations... I just wish I would have found y'all first!!

Thanks again for your great team of people!!! You definitely have the A team!!

Alex Weld
